# TOMTOM<sup>®</sup>

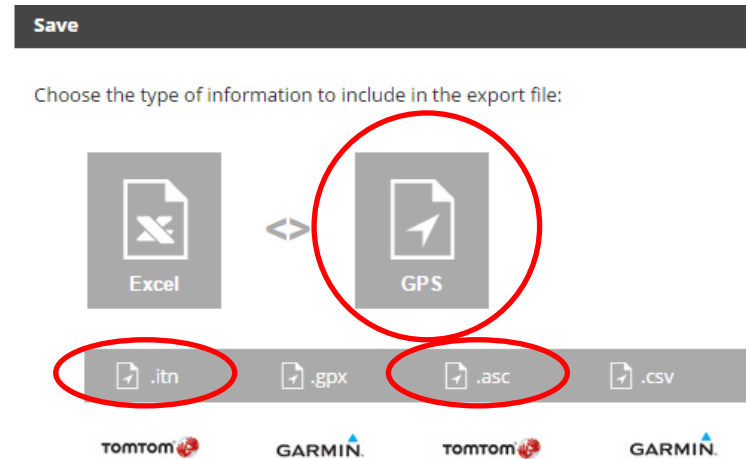

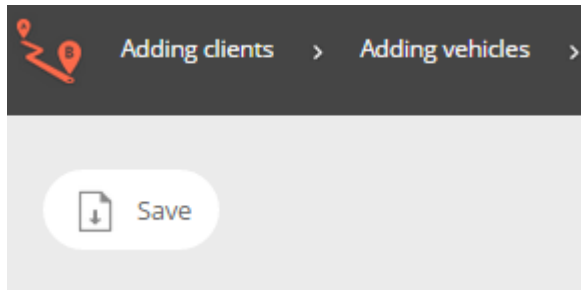

## Save route to TomTom GPS

When the route is already planned you can save it to your GPS and use it to guide you when driving throughout the route.

### STEP 1: Save the planned route on your PC, in the format for TomTom GPS

- ✓ Check if your GPS supports the "itn" format. Then, click on the "save" icon, click on the "GPS" and click on the "itn" icon,.
- ✓ Now you have downloaded the route on your PC, the file "planexport.zip"

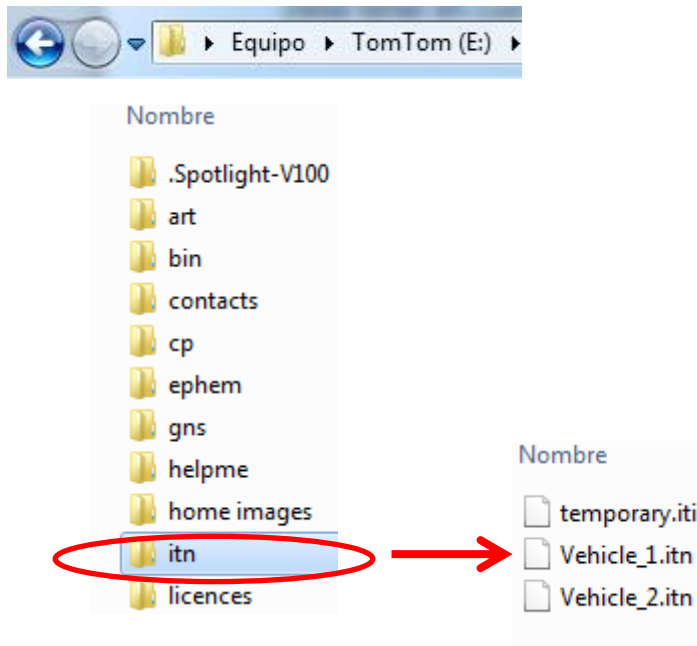

- ✓ Open the file "planexport.zip". You must have a route for each vehicle. In this case, as we have planned a route with two vehicles, we will have a file for each of them. Save the ".itn" file on your computer (on the site and folder you prefer).

File Name	Size	Count	Format
planexport.zip			
Vehicle_1.itn	214	167	Archivo ITN
Vehicle_2.itn	1.253	641	Archivo ITN

## STEP 2: Add the route to the GPS

- ✓ Connect the GPS to the computer.
- ✓ Open the "ITN" folder on the TomTom.
- ✓ Copy the file with the planned route that you downloaded (eg. "Vehicle\_1.itn") and paste it in the "ITN" GPS folder.

## STEP 3: Drive guided by the GPS

- ✓ Disconnect the GPS from your computer safely and then turn on the GPS.
- ✓ Access the TomTom menu, access to "Route Planning". Then, click on "Options", "Load the Route" and, finally, select the file with the planned route (in the example "vehicle\_1.itn").
- ✓ Click "Done" and a route message will appear informing about the first stop. Click "Yes" and the route will start.

  
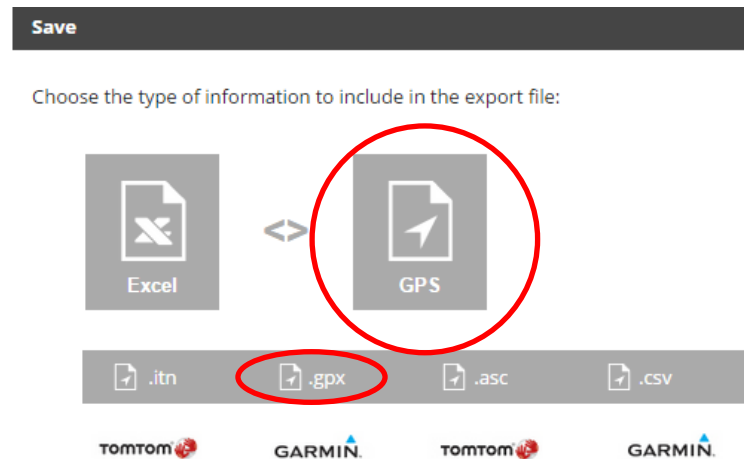

**GARMIN**™

## Save route to a Garmin GPS

When the route is already planned you can save it to your GPS and use it to guide you when driving throughout the route.

### STEP 1: Save the planned route on your PC, in the format for Garmin GPS

- ✓ Click on the "save" icon, click on the "GPS" and click on the ".gpx" icon.
- ✓ Now you have downloaded the route on your PC, the file "planexport.zip"

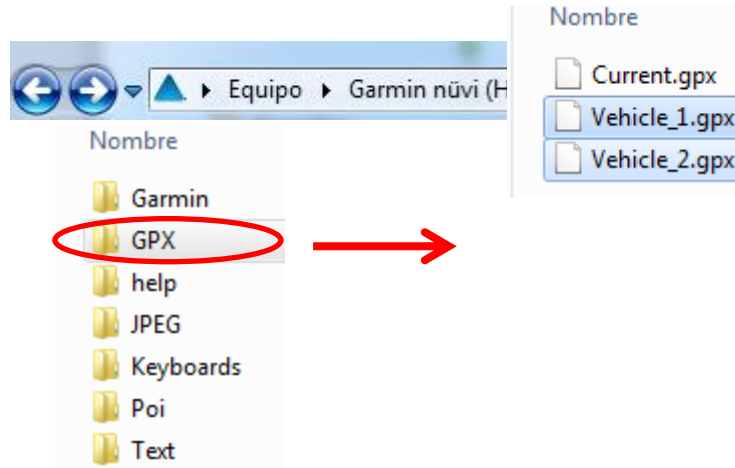

- ✓ Open the file "planexport.zip". You must have a route for each vehicle. In this case, as we have planned a route with two vehicles, we will have a file for each of them. Save the ".gpx" file on your computer (on the site and folder you prefer).

## STEP 2: Add the route to the GPS

- ✓ Connect the GPS to the computer.
- ✓ Open the "GPX" folder on the Garmin GPS.
- ✓ Copy the file with the planned route that you downloaded (eg. "Vehicle\_1.gpx") and paste it in the "GPX" GPS folder.

## STEP 3: Drive guided by the GPS

- ✓ Disconnect the GPS from your computer safely and then turn on the GPS.
- ✓ Go to the "Utilities" folder from the GPS, access to "My Data". Then, click on "Import route" and a window will open where you will be able to choose a route (a file .gpx)
- ✓ Select the route to be done (for example, "vehicle\_1.gpx") and click "Import". You already have a route available in your GPS. A message like this will appear: "The data has been successfully imported." Click "Accept".
- ✓ To start the route on your GPS, you must log in again to the option "Utilities", "Routes", select the path we want to do (in the example, "vehicle\_1.gpx"). Finally, click "View map" and click "Go".
