

Routing Reporto

Comments: Indications for each client

Indications for each client

Using the "Comments" column, you can add additional information that will be available in the printable version of the planning and that can be viewed by the driver via [the Routing Reporto APP](#) for mobiles (if you have hired the [Monitoring Module](#)).

Province	Country	Possible Visit From	Possible Visit Until	Visit Duration	Comments
London	United Kingdom	09:00	18:00	0:45	Get 10 units
London	United Kingdom	09:00	18:00	0:20	Collect the defective units

To begin, you must download the template "Comments" for Excel clients. We recommend using the new clients' Excel (that is mainly the same Excel that was already being used, but to which we added the "Comments" column). If you prefer to, you can also add the new column to its previous Excel.

Always remember that it is very important to keep the format of cells and not to rename the columns.
